

REISSUE APPLICATION DECLARATION BY THE INVENTOR	Docket Number (Optional)
	47097-00057USPR

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed in patent number 6,279,298, granted August 28, 2001, and for which a reissue patent is sought on the invention entitled Fill-Through-The-Top Package And Method And Apparatus For Making The Same,

the specification of which

- is attached hereto.
- was filed on August 25, 2003, as reissue application number _____ and was amended on _____
(if applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below.
(Check all boxes that apply.)

- by reason of a defective specification or drawing.
- by reason of the patentee claiming more or less than he had the right to claim in the patent.
- by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

U.S. Patent No. 6,279,298 relates to creating a fill opening between one track of the fastener and one of the panels. Claim 9 of the '298 patent, for example, requires a "folding" step that is unnecessary for claim 9 to be patentable over the prior art. Hence, new claim 17 has broadened this aspect of claim 9. Claim 9 of the '298 patent also requires the attachment to occur "near a longitudinal edge of the first panel," which is also unnecessary for claim 9 to be patentable over the prior art. Hence, new claim 17 has broadened this aspect of claim 9, as well. Thus, claim 9 was drafted too narrowly because it includes limitations that were not needed for the patentability of the claims.

Furthermore, the methodology of creating a fill opening between one track of a fastener and a web, wherein the fastener includes a preattached slider, was not claimed as broadly as it could have been in the '298 patent. Accordingly, new claim 51 broadens the overall claim scope with respect to this subject matter.
